

# Shahraz Ali

## SQA Engineer

Results-driven QA Engineer with 2 years of experience creating and implementing efficient automation frameworks, including Mocha, Jasmine, and Cucumber BDD. Continuously improved testing processes and tools based on experience and best practices within the Agile framework. Proficient in SDLC, adept at designing and executing automated test scripts using industry-leading tools. Analytical mindset with strong problem-solving skills, committed to optimizing software quality through automation.

## Experience

### ● Amrood Labz

12/2023 - Present

#### SQA Engineer

- Collaborated with stakeholders to understand project requirements and functionalities.
- Worked with the team lead to define and document customized QA processes aligning project needs with STLC principles.
- Actively participated in daily standup meetings to provide updates on testing progress.
- Developed comprehensive test cases and scenarios covering various functionalities, user flows, and edge cases.
- Created and maintained automated test scripts using industry leading tools and frameworks to improve test coverage and efficiency.
- Conducted manual and automated test runs according to the test plan.
- Analyzed test results, identified defects, and documented them clearly with reproducible steps.

### ● Black Box Labz

05/2022 - 11/2023

#### Automation Engineer

- Collaborate closely with the development team to understand requirements and estimate test effort.
- Write clear, concise, and comprehensive test plans and cases, ensuring they cover all functionalities within sprints.
- Develop efficient and maintainable test scripts for web applications, hybrid solutions, and mobile apps.
- Utilize Cypress, Webdriverio, Appium, and BrowserStack for comprehensive cross-browser and cross-platform testing.
- Participated in daily stand-ups to communicate testing progress and identify any blocker.
- Shared detailed test results reports with the team, highlighting successes and areas for improvement.

## Projects
