

SHAHRAZ ALI

SQA Automation Engineer | QA Analyst 

SUMMARY

Hello! My name is **Shahraz Ali**, and I bring over two years of experience as a **QA Automation Engineer**. I specialize in developing and implementing efficient **automation frameworks** that not only enhance the testing process but also ensure high-quality software delivery across **web** and **mobile** platforms.

I am proficient in a wide range of tools and technologies, including **Cypress**, **WebdriverIO**, **Appium**, and **BrowserStack**. My core areas of expertise include designing automated test scripts, improving test coverage, and optimizing testing processes for better efficiency. Whether it's creating automation frameworks from scratch, conducting **manual testing**, or collaborating with **cross-functional** teams, I ensure every release meets the highest quality standards.

SKILLS

TOOLS:

- | | | |
|----------|--------------|------------------|
| Youtrack | - Trello | - Jira |
| Qase.io | - Cypress | - Azure Devops |
| Appium | - Playwright | - WebdriverIO |
| Git | - GitHub | - BrowserStack |
| GitLab | - Bitbucket | - GitHub Actions |
| Jmeter | - Postman | - Cucumber BDD |
| CI/CD | - Jasmine | - Mocha |

HARD SKILLS:

- | | |
|----------------|-------------------------|
| Mobile Testing | - Agile Methodology |
| Web Testing | - Automation Frameworks |
| Manual Testing | - Automation Testing |
| Smoke Testing | - Test Case Writing |
| Api Testing | - Test Case Execution |
| Sanity Testing | - Functional Testing |
| Bug Tracking | - Regression Testing |

Education

Bachelor in Computer Science
Superior university, Lahore
2018-2022

PROFESSIONAL EXPERIENCE

SQA AUTOMATION ENGINEER

Dec 2023 - Present

Amrood Labs (Onsite)

Key Responsibilities

- Collaborated with project managers and developers to gather and refine requirements, aligning test cases with project goals and software testing lifecycle (STLC) principles.
- Designed and executed comprehensive test cases and scenarios, improving test coverage and ensuring accuracy across various functionalities and user flows.
- Led the development of automated test scripts using Cypress, reducing regression testing time by 40%.
- Integrated automated tests into CI/CD pipelines, ensuring continuous testing and faster feedback loops, which accelerated high-quality releases.
- Managed defect tracking and resolution using tools like Qase.io and YouTrack, reducing average bug resolution time by 20%.
- Worked with team leads to improve QA processes, incorporating best practices, and contributed actively in Agile ceremonies, ensuring efficient collaboration and problem-solving.
- Mentored junior QA engineers, enhancing team-wide proficiency in automated testing techniques.

SQA AUTOMATION ENGINEER

May 2022 - Nov 2023

Black Box Labz (Onsite)

Key Responsibilities

- Collaborated with development teams to define requirements, estimate testing efforts, and ensure comprehensive test coverage within sprints.
- Developed maintainable automated test scripts for web, hybrid, and mobile applications using Cypress, WebdriverIO, Appium, and BrowserStack.
- Created clear and detailed test plans and cases, conducting both manual and automated testing, including smoke and regression tests.
- Actively participated in daily standups to provide testing updates and address blockers, while sharing detailed test results and improvements with the team.
- Established new automation frameworks from scratch, optimizing testing efficiency across multiple projects.

Projects

Dmarc Report | Amrood Labs

A tool designed for MSPs and service providers to monitor and manage DMARC compliance for multiple domains.

- Role: Led automation efforts, creating test scripts in Cypress and ensuring comprehensive test coverage. Managed test cases in Qase.io and logged defects in YouTrack.

Almariding | Amrood Labs

A marketplace connecting horse farm owners with riders, offering services and streamlined booking systems.

- Role: Managed the testing lifecycle, conducting both automated regression testing and manual smoke tests. Used Trello for bug reporting and managed weekly client meetings.

Dao Proptech | Black Box Labz

Pakistan's first digital real estate investment platform, enabling users to buy, sell, or invest in property digitally.

- Role: Developed automated test scripts using Cypress with BDD, created a new automation framework, and conducted manual and automated testing for regression. Tracked bugs using Jira.

MiPro | Black Box Labz

A hybrid app for Motion Industries, streamlining operations across 550+ locations in North America.

- Role: Created and executed automated test scripts for web and mobile (Android/iOS) using WebdriverIO and Appium. Performed testing on BrowserStack and maintained test coverage on Azure DevOps.

Scan123 | Black Box Labz

A document management platform focused on regulatory compliance and secure file storage.

- Role: Developed test cases, performed smoke and regression testing, and documented issues using Google Docs.
